MEET THE CONTRACTORS

Joint Seminar with NHS & Healthcare Waste Industry

Wednesday 28th October 2009, Hilton Hotel, Coventry

Over the past few years, waste management has risen in importance for healthcare organisations across the UK. Revised legislation, compliance with governance requirements, cost pressures, sustainability, limited resources and many other factors have contributed to the increased requirement to manage healthcare waste effectively and efficiently.

Presentations:-

The Management and Disposal of Hospital Generated Healthcare Waste:

Grundon Waste Management is one of the UK's leading suppliers of integrated waste management solutions. Grundon deal with all aspects of hazardous waste management, including contaminated waste, clinical/medical waste disposal.

The Management and Disposal of Community Generated Healthcare Waste:

Cannon Hygiene & Kensington and Chelsea PCT Estates and Facilities Shared Services will look at the production, collection and disposal of healthcare waste generated in the Community from the point of view of both the PCT acting on behalf of the Producers and Waste Management Contractors. Cannon Hygiene have had contracts to collect and dispose of waste for PCTs across the whole of the UK

Segregation & Disposal of Sharps:

Daniels Healthcare assist in the segregation and disposal of Sharps by manufacturing containers that conform to the regulations recommended in HTM07-01, BS3720 and UN3291. We also provide training and educational posters to healthcare and commercial and Occupational Health workers.

The Range of Disposal Technologies Available:

Vetspeed Ltd's mission is to help public and private sector organisations to legally, safely and ethically dispose of wastes. Vetspeed Ltd has introduced new plants and technologies to safely and securely dispose of a range of waste types.

The Contracting Processes in Healthcare Waste Management:

LPP's role is to establish collaborative procurement between the NHS Trusts in London. Historically Waste Services have been bought by individual Trusts; however, in the last year LPP has co-ordinated two collaborative tenders including 37 London Trusts. The new procurement process has led to substantial benefits and increases in efficiency for both Trusts and suppliers.

Waste Research: Looking to the Future:

Sustainable healthcare waste management is very important. As more healthcare is delivered in the community and the number of day surgeries increases there will be increases in the quantities and nature of these wastes will change. Future policy needs to be made, and capacity needs to be planned, based on evidence and this will require a programme of research.

Lunch and refreshments are provided and there are networking opportunities throughout the day's agenda.

Seminar Programme

09.00 *Registration & Coffee*

09.45 Introduction

09.55 **Andy Stratton**, Grundon Waste Management Ltd & another organisation
